1. Introduction

Centerfuel International AB, hereinafter Centerfuel, is committed to conducting business in a responsible and sustainable manner. As a small international consultant and supplier of alternative fuel, We practices with the principles of ESG – Environmental, Social and Governance – and take personal responsibility for ensuring compliance and integrity. Working with clients in Waste management, Heat and power plant, and cement kilns, we recognize that our operations have a big impact on the environment, and society.

2. Environmental Responsibility

Centerfuel integrate environmental considerations into all aspects of our business. We strive to:

- Reduce greenhouse gas emissions and support the transition to a low-carbon economy.
- Promote resource efficiency and circular solutions in the Waste sector.
- Protect biodiversity and minimize negative environmental impacts across the value chain.

Our biggest opportunity to contribute to a reduction of greenhouse gases lies in the choices of the fuels we supply.

- We only trade with alternative fuels that has no chance to be recycled and circular.
- We provide heat and powerplants and Cement kilns an alternative fuel with lower fossile CO2 emissions than the fuel they run on today.
- We dramatically reduce the green house gases from landfills by turning residual waste to fuel and trade them to powerplants with some of the world's highest R1 value.
- We choose transport solution with care, prioritizing modes of transport with low CO2 footprint. Following RED III directives.

3. Social Responsibility

We acknowledge our responsibility toward people and communities. Centerfuel commits to:

- Respect internationally recognized human rights.
- Ensure fair business practices and equal opportunities in all collaborations.
- Foster diversity, inclusion, and respect in every business relationship.
- Contribute positively to the societies in which we operate.

4. Governance and Integrity

Strong governance is the foundation of sustainable business. We pledge to:

- Maintain transparency and accountability in decision-making and reporting.
- Uphold zero tolerance for corruption, bribery, and unethical practices.
- Ensure fair treatment of partners and stakeholders.
- Continuously improve compliance routines in line with international standards.

5. My Commitment

By following ESG principles, Centerfuel strengthens trust with partners, clients, and stakeholders. I believe that responsible business practices not only reduce risks but also create long-term value and contribute to a sustainable future. As a one-person company, I take direct ownership of these commitments and ensure they are embedded in every transaction and relationship.

6. Abbreviations

- ESG – Environmental, Social and Governance
- GHG – Greenhouse Gas
- EU – European Union
- UN – United Nations
- CSR – Corporate Social Responsibility
- EDD – Enhanced Due Diligence (relevant when ESG overlaps with compliance)
